If you require this information in another format, please call us on 08000 272 128 or text 07825 385 414. We can provide support from interpreting services if required and information can be provided in a range of languages on request.

Patient, Family and Carers Experience

We are here to listen, learn and improve

Concerns
Compliments

Comments
Complaints

The Patient Experience Team provides support throughout the patient, family and carer experience.

Our focus is to provide a streamlined approach to feedback which is not rigid or process driven. The Trust will respond to concerns and complaints in the most appropriate way for the individual and the circumstances using a person-centred approach.

It is expected that front-line staff will respond quickly, sensitively and effectively to people when issues are raised.

Family Liaison staff are here to offer advice and support to families following serious incidents and unexpected deaths.

We collect information from a range of sources including: service receivers, carers, family members, Healthwatch Derby, Healthwatch Derbyshire, the Family and Friends Test, Care Opinion and NHS Choices in relation to the 4Cs - Concerns, Compliments, Complaints and Comments. The information is collected in Datix (our central database) and reported on a quarterly basis. Feedback can be provided in a range of formats including e-mail, telephone, in person and in writing.

COMPLIMENTS AND COMMENTS

Compliments are recorded locally by staff. ***"Your feedback" cards are available within teams for general comments*** and responses are reported locally on the 'You said - We did' posters.

CONCERNS AND COMPLAINTS

Concerns and complaints will be dealt with in a manner that is proportionate and appropriate to the issues being raised. Staff will discuss with you how and when you would like feedback about your concerns. Actions taken will improve services and ensure learning takes place.

If you raise a concern with staff you can expect that they will take steps to resolve the matter themselves. If this is not possible advice will be sought from their manager or the Patient Experience Team.

Complaints should be investigated as swiftly and robustly as possible. We don't have a fixed timescale for responding to your complaint; the timeframe is flexible. We will negotiate that with you taking into account the complexity of the investigation and your personal circumstances. We will agree timescales with you and let you know if we need to extend them. Meetings with investigating officers will be offered at the start and end of the investigation process. Once this process has been concluded a meeting with the Chief Executive or a member of the Executive team can be arranged.

Consent to provide clinical information in our responses will be required from the service receiver if the concern or complaint is from a third party. We will still respond in general terms if consent is not received. You or the person concerned will not be discriminated against if you raise a complaint – no information about your concern or complaint will be kept in your clinical files.

INDEPENDENT REVIEW

If you are not happy with our response to your complaint you can ask for a process review. This will be undertaken by an appropriate senior manager. If we think we have done everything to resolve your complaint we will advise you of your right to take your complaint to the Parliamentary and Health Service Ombudsman which makes final decisions on unresolved complaints about the NHS in England. It is an independent service which is free for everyone to use.
