Who we are

We are **Derbyshire Healthcare NHS Foundation Trust**. We run healthcare services in Derbyshire.

Our plan

This is our plan about our work.

The plan tells you what we are doing now and what we want to do in the future.

We want

- To work together to give everyone the best care we can.
- All our patients to get the services they need – at home, in hospital and in the community.
- All our services to be easy to find and easy to use.

We will

- Put our patients at the centre of everything we do.
- Respect our patients and treat them in a good and fair way.

- Work together as a team so everyone does their job well.
- Talk to our staff so that everyone gets to decide things in an honest and open way.

- Deliver the best healthcare with the partners we work with.

Our work

1. Services are the best they can be so that everyone is kept safe and gets the best care.

2. We will work with partners so everyone gets care in the right place at the right time.

3. Our staff are good at their jobs and enjoy working for us.

4. Spend money in the best way so our services are the best and keep going for a long time.

Outcomes for patients

- Patients and carers know as much as they can about their health and care.

- Services will be available 7 days a week.

- Patients have their care linked up across different services – for both physical and mental needs.

- People get a choice of treatments.

- GP's are fully involved with helping a person with **dementia** or mental health needs. **Dementia** is an illness that affects your brain. It is more common with older people.

Outcomes for staff

- Staff work together across different services for people of different ages.

- Staff have a good balance between working and home.
- Computers and IT equipment work well so that staff have more time to be with patients.

- Our staff receive training to do their job as well as they can.

Changes in our services

We want

- Services to be linked up so that patients only have to say what they need once.

- Patients and carers to be happy with their care.

- To make it easier for patients to find and use services – we call this getting **access to services**.

- Patients to feel better in their physical and mental well being.

- Patients to have a better quality of life.

We want

- Staff to feel happier in their work.
- Staff to care for patients at home instead of hospital, where possible.
- To allow staff to work in a flexible way so that patients get the care they need, where they need it.
- Everyone to work together to make healthcare better in the community.
- Make the money we spend on our services last for a long time.

Checking we are getting things right

We know we are getting things right if

- The **Care Quality Commission** in charge of checking healthcare say we are doing a good job.

- Patients tell us we are giving them the best care.

- Staff tell us we are doing a good job when they answer questions in our staff survey.

- We spend money in the right way and reach our targets.
