| Extra Information: | PTSD Resolution helps ex-service men and women who have mental health problems, including post-traumatic stress disorder, following service in the UK armed forces. The service is available to all veterans of the UK armed services, TA, reservists and their dependents. PTSD Resolution treatment meets a special need of veterans and reservists in that it can be carried out without the therapist or anyone else ever knowing about the events that caused the trauma. This ensures confidentiality, protects the patient from further distress, and protects therapists from hearing about large numbers of often extremely disturbing incidents. These are important safeguards. |
